

## Little House in the Big Woods Lapbook

### About the Lapbook

This lapbook is full of activities based on Laura Ingalls Wilders book “Little House in the Big Woods” which she originally published in 1932.

You may use these materials for your personal or classroom use only.

If you have any questions about intended use, please contact me first.

### About the Graphics

All the the images and graphics included in this lapbook were either hand drawn by me or are copyright of Jupiter Corporation.

Everything in this lapbook is copyrighted, and must not be copied or sold for any reason. You may not share this lapbook online, or in file sharing programs. Please simply direct people to our website where they can print their own copy. This helps keep our site online and free.

### Intended Age Level

This lapbook was created for my 4 year old daughter, and the materials and lessons reflect her age. If you have older children, it is recommended that you find supplements online, however this lapbook will work well for children in early elementary, with simple additions like a vocabulary list, and perhaps some mathematics and science experiments along the way.

### Use of the Lapbook

There is a recommended reading guideline to follow based on the different Crafts, Activities, and printable books included. This of course is just recommended, and was just how we ended up reading it at our house.

**Thank you for your continued support!**
